

Are you looking to start your own Brokerage? We provide an myriad of services individuals and institutions.

How About Prices ?

Prices depend on how you customize your packages.
Starting a Forex brokerage involves the following Stages .

- 1. Legal Formation :** Legal formation remains one of the toughest task which any broker hates to do ,which includes the company formation, obtaining the necessary licenses, setting up a corporate bank account, etc. Fxwhitelabel.net does this toughest job for you.
- 2. Technology Setup :** We provide a myriad of end to end technological solutions which includes the website,MT4 mobile manager application platforms, CRM, other Plugins and tools required to run your brokerage, etc.
- 3. Liquidity :** This is where you get all those instruments to trade. With our unique business model we allow you to choose any liquidity provider you like. Our high speed bridge can connect the platform to any Liquidity provider you select to work with.

Legal Formation – Confused between Regulated and Unregulated Setup?

A regulated setup is perfect because it offers you a dedicated license to operate a Forex brokerage under the financial regulatory authority of the corresponding jurisdiction.

A regulated forex broker must keep its clients' funds in segregated accounts that are completely separate from the company corporate bank account. It ensures that customer funds are protected and prevents companies from closing their offices, moving their clients' funds away, and absconding with the money. It means that a company cannot use the money in one trader account to pay-out another winning trader.

With an unregulated setup, what you get is an international business company in compliance with the laws of the jurisdiction and the brokerage operations will be carried out under that. If you can afford, we always recommend a regulated setup. Over 90% of the retail brokerages out there are unregulated and it is perfectly alright if you want to start unregulated.

Please contact us for a quote.

What about Payment Service Provider & Bank Accounts?

We do offer a **Payment Service Provider (PSP)** account. Setting up a Bank account depends on several factors like the nationality of the directors/shareholders. We work with many reputed banks and we can help you to apply with a number of them until you get at least one accepted.

Note : Banking rules are getting stricter each year. At their sole discretion, the PSP (Payment Service Provider) or the bank reserves the right to accept or reject the application. However, we will help you to apply with different providers/banks until you get one approved.

The LP Account - How Much for the Liquidity Provider to Start With?

We deliver only the technological solutions and are not into the financial parts of the brokerages. We do not suggest any liquidity provider from our side but we help our clients to setup their LP without taking any setup cost from them.

Platforms You Provide ?

We deliver both **MT4 and MT5** trading Platform. We provide best rates in the market for White Label packages starting at **\$2500 monthly rentals** having **one time set-up fee of \$5000**. We also have additional offer for you which includes Corporate Package whose **monthly rental is \$3500** along with the **onetime set up cost of \$4500** and Advanced Packages starting whose **monthly rental is \$3000 & onetime setup cost is \$4500only**. Apart from this we also have highly customized solution based on your unique needs. *Please contact us for a quote.*

What are the inclusions in the packages?

In addition to the Metatrader platform, most of the packages come with FREE Website, FXCRM, and Mobile Manager Application. We have developed a set of ready solutions for the growing in popularity multi-asset platform. These plugins and applications will help MT4/MT5 brokers to offer the initial set of services required by their clients. Our MT4/MT5 product range continues to grow. **Single level IB Plug-in, Bonus Plug-in are included as complimentary offer**. Further, our technical team is always available to customize the features to suit your unique needs – the Complete Package under your own Unique Brand!

Prime Features

- Branded MT4/ MT5 Terminal
- Up to 50 MT4 Manager Access
- Up to 20 Groups
- Up to 64 Symbols of your choice
- Single/ Multi-Level IB, MAM
- Auto-Dealer, Leverage Manager
- Bonus Manager, MT4/MT5 Gateway
- Datacenter in your Region
- Brand Website

What about risk?

We offer both A and B books. Our Risk Management features include, but not limited to:

1. **Risk Monitor & Notifier** - Alerts on profit maker, high frequency trader, and risky trader
2. **Risk Management Engine** - We set the rules and so that the Orders get sent to the LP automatically when the given rules are met
3. **Virtual Dealer**- Virtual Dealer Plugin is the solution for protection against traders using platform vulnerability by scalping on delayed quotes.

FREEDOM of Liquidity

Many other service providers limit your liquidity choices only to the provider(s) they work with. But our model is unique; **Fxwhitelabel.net** allows you to choose any Liquidity Provider you like and helps you to open a relationship with them using our industry connections.

Revenues?

Unlike other conventional forms of business, Forex brokerage allows you to generate appealing revenues with a little investment.
